VROOM Interim Results

VROOM Interim Results July 2022 Vaccine Response On Off Methotrexate (VROOM) Study What is methotrexate? Methotrexate is a medicine that helps people with inflammatory conditions such as rheumatoid arthritis. Inflammatory conditions result from the immune system getting out of control. Methotrexate works by trying to turn [...]

Article

Vaccine perceptions in inflammatory conditions

Vaccine perceptions in inflammatory conditions November 2022 Why did we do this study? The immune system protects the body from infection, it attacks germs and helps keep us healthy. In the UK, around one in fifty adults have a condition where the immune system is too active and mistakenly

[NRAS report on the impact of living with active RA but not being able to access advanced therapies](#)

[In 2020, NRAS conducted a survey amongst its members and non-members who had RA with a disease duration more than 20 years, who were not on advanced therapies \(i.e. biologic/biosimilar or targeted synthetic DMARDs \(JAK inhibitors\)\), with the aim of revealing the everyday impact of living with RA in people not treated with advanced therapies. It \[...\]](#)
