NRAS Health Wallet

The NRAS Health Wallet is an app currently in development. Cohesion Medical have partnered with NRAS to create this app and some of our Volunteers are currently undergoing long-term testing of the app's features.

[Print](#)

NRAS has been working in partnership with Cohesion Medical to test and develop an app which helps you to manage your RA in a lot of different ways. This app, which we are calling the NRAS Health Wallet (just like a wallet you can put things in and take things out), is being used and tested with a number of our NRAS Volunteers over the longer term. NRAS is connected directly to the Health Wallet and so can message useful information to the users. The app also has the ability to connect to a number of different services, including rheumatology units.
