[The OCTAVE study results](#)

[The OCTAVE study results were released on 24 August 2021 and we realise that the initial headlines could cause concern and worry. The study looked at vaccine response of those who are 'immuno-compromised' which includes a very wide range of people at varying levels of immune-compression. What the study has shown is that compared to people \[...\]](#)

[Update on COVID-19 restrictions](#)

[As England prepares for so called 'Freedom day' on Monday 19 July there are many grave concerns about the level of restrictions being lifted. We strongly recommend and urge people to continue to wear face coverings on public transport, inside public premises and especially in healthcare settings.](#)

[This is essential to keep people safe and \[...\]](#)
